ALWIYAH NUR SYAHIRA ALHADDAD

087885602646 | syahiiralhaddad@gmail.com | www.linkedin.com/in/syahiralhaddad | https://portfolio-syahira.vercel.app/

Recent Electrical Engineering graduate with an analytical, problem-solving, and detail-oriented mindset. Eager to grow in data analytics, AI engineering, project management, and telecommunications. Brings internship experience across multiple industries in analyzing data, translating technical findings into clear recommendations for stakeholders, and leading cross-functional initiatives from planning to execution.

EDUCATION

Universitas Indonesia, Depok, Indonesia 2022 — 2026
Electrical Engineering | Telecommunications | GPA: 3.60/4.00

WORK EXPERIENCES

Cybersecurity & Emerging Technology Risk Analyst Intern
Otoritas Jasa Keuangan | *Indonesia's independent financial services regulator* August 2026 — Present
- Outlined OJK's **upcoming public cybersecurity incident playbook** for banks, **presented to the Deputy Director**.
- Mapped **17 real banking incidents** to **MITRE ATT&CK and NIST**, turning detection gaps into **playbook content**.
- Turned **post-quantum cryptography** research into **policy recommendations** for **OJK's upcoming public study**.

Project Control Engineer (Project-Based Contract)
PT Aspen Medical Group Indonesia | *Australian-based global healthcare services provider* July 2026 — August 2026
- Established the **company's first formal Tender SOP**, standardizing vendor submission and contract revision reviews.
- Created the **first document monitoring dashboard in Excel**, replacing manual SharePoint checks for **20+ contractors**.
- Identified **quantity discrepancies prior to invoicing** by reconciling contracted against delivered materials in **Oracle**.

Issue to Prevention Engineer Intern
PT Schneider Electric Indonesia | *Global energy management and automation company* July 2025 — May 2026
- Reduced **warranty claim turnaround from over a month to 1–7 days** by building a **Power Apps and Power Automate** workflow linked to **Power BI and SharePoint**, **adopted by 3 cross-functional teams**.
- Ensured **timely spare part replacements** for warranty claims by monitoring part availability in **SAP MM**.
- Resolved **all 50+ customer cases in Salesforce (bFO)** under Issue to Prevention with SOP-based **preventive actions**.

Product Domestic I Operation Intern
PT Pertamina International Shipping | *Marine logistics subholding of Pertamina* February 2025 — March 2025
- Maintained **50+ vessel certificates with zero expiries** in the **Port Management System**, preventing downtime.
- Recommended a **shorter certificate renewal cycle**, **adopted by the team** to speed up on-hire and off-hire recording.

Datacomm Product Management Intern
PT Telkom Indonesia (Persero) | *Indonesia's largest state-owned telecommunications company* July 2024 — August 2024
- Analyzed **bandwidth at 40 sites** using **Cisco vManage and Python**, with **recommendations adopted by the team**.
- Replaced manual reporting with an **Excel network capacity dashboard** co-designed with network administrators.

ORGANIZATION EXPERIENCES

Business Analyst Officer
Indonesian Youth Diplomacy | *Youth policy organization representing Indonesia at the Y20* February 2024 — December 2024
- Refined **sponsorship packages and pitch materials** for Gala Indonesia Emas 2045, helping secure **8 sponsors**.
- Supported on-time delivery of the **2024 Gala Dinner for 137 attendees** through rundown and milestone tracking.

PROJECTS

5G Traffic Classification Using Stacking Ensemble Learning, XAI, and Time Series Analysis August 2025 — 2026
- Achieved **99.95% test accuracy on 65,766 records** with a **stacking ensemble** of KNN, SVM, and Random Forest.
- Developed a **Python Flask dashboard** with live training progress, temporal analytics, and **LLM-based XAI insights**.

Machine Learning-Based Regression Methods for Battery RUL Prediction October 2024
- Achieved a **test R^2 of 0.9998 and MAE of 3.35 cycles** with Linear and Ridge Regression **built from scratch in NumPy**.

Machine Learning-Based Bandwidth Optimization for Cisco SD-WAN Using Random Forest August 2024
- Reduced **bandwidth forecast error by 69%** versus baseline (R^2 0.90) with a **Random Forest** model and time-series CV.
- Developed **SARIMAX forecasting** and **4-level threshold-based anomaly detection** to flag bandwidth usage spikes.

CORE COMPETENCES

Skills – Project Management, Business Analysis, Data Analysis, Data Science, Machine Learning, Data Visualization & Dashboard Development, Quality Assurance, Process Improvement, Process Automation, Root Cause Analysis.
Interpersonal – Critical Thinker, Adaptive, Negotiation, Collaborative, Effective Communicator, Detail-Oriented.
Tools – Microsoft Office Suite, Google Workspace, SQL, Python, Oracle, SAP MM, Salesforce, Microsoft Power Apps, Microsoft Power Automate, Power BI, Tableau, MATLAB, Figma, Canva.
Languages – Proficient in Bahasa Indonesia and English.
Certification – IBM Data Science Professional Certificate (May 2026), IBM AI Product Manager Professional Certificate (November 2025), Nokia Bell Labs E2E 5G Foundation (December 2024), Schneider Electric Professional Trainings (August 2025), Accenture Digital Skills: Digital Marketing (June 2023).
Awards – Best Presenter, FORTEI-ICEE 2026 (September 2026), for the paper “Traffic Classification for 5G Service Classes using Stacking Ensemble Learning and Time Series Analysis with Integration of XAI and Interactive Dashboard.”
